

SEAWAYS GO AUTOPILOT

Affordable point and GO autopilot that is easy to install.

DOMETIC

OPTIMUS STEERING INNOVATION

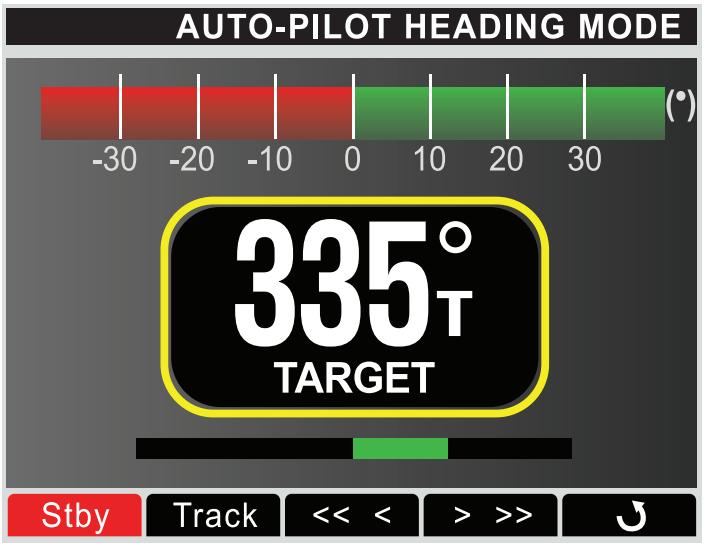

The Dometic Seaways Go Autopilot is designed to work with both Optimus electro-hydraulic and electric outboard steering systems. It takes advantage of the components that make up the Optimus EPS system, so that no additional parts are needed. Smart algorithms are used to prevent constant corrections and movement, resulting in a smoother and more comfortable journey.

Benefits with SeaWays Go Autopilot

- Single or multi-engine Optimus EPS outboard vessels.
- Affordable point-and-go autopilot system.
- Save money with no need for additional pumps.
- Display heading information on compatible multifunctional displays.
- Holds magnetic heading only.
- Connects to CAN2 (private) or CAN3 (public).
- Simple single-step calibration.
- Kit contains a 15' harness, tee connector, mounting hardware, install/operating manual.
- SeaWays GO requires a license code activation that is entered via the Optimus CANtrak display.

Model Number	EPSK1700
Supply Voltage	8-16 VDC
Operating Temperature	-25C to 65C
Approvals Compliance	CE under EMC directive 2014/30/EU
Warranty	2 years
Waterproof Rating	IPx7
Technology	Solid State, 9-axis sensor
