

PRO-PEDAL FOOT THROTTLE

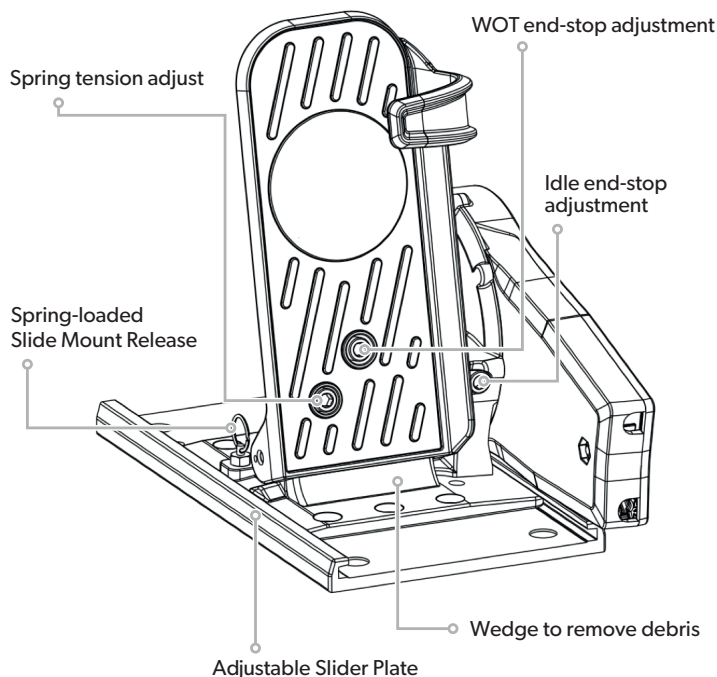

Driving a high speed bass boat often requires you to keep both hands on the wheel, so installing a foot throttle is ideal. Pro-Pedal provides a comfortable operating experience for the driver and incorporates components that will greatly improve durability and reliability.

COMPACT AND FLEXIBLE TO ENSURE YOUR COMFORT

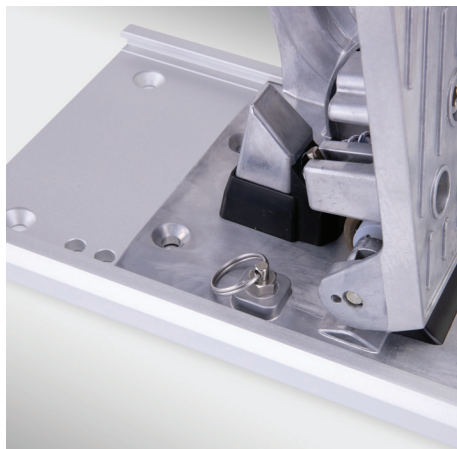

Dometic's Pro-Pedal foot throttle meets the individual requirements of a high performance bass boat driver. Offering significant advantages in terms of customization and comfort, its compact design keeps the boat floor uncluttered and allows for more room around the pedal. The adjustable pedal angle allows a driver to set up their boat for the perfect driving position. An integrated slide makes it easy to adjust the position of the pedal to suit different drivers.

Benefits with Pro-Pedal

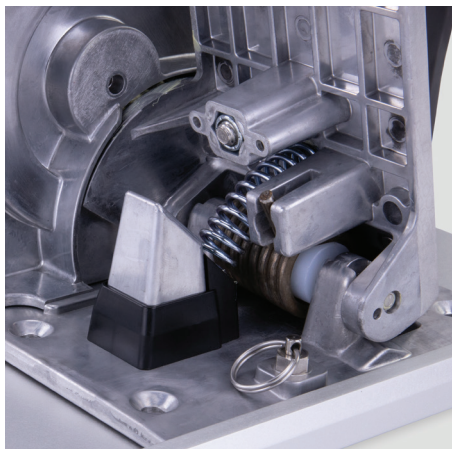

- Allows the throttle cable to be routed from the front, back or above.
- Locking fasteners hold a tight fit even under stress.
- The enclosed mechanism and unique wedge prevents debris from inhibiting pedal function.
- The mechanism is "universal" meaning it will accept any OEM style or 30 series engine specific sized cable.
- Pedal position and travel can be easily adjusted to match the ergonomics of the driver while still providing full idle-to-WOT control.
- Compact design keeps the boat floor uncluttered and allows for more room around the pedal.
- Toe hook at the top of the pedal to allow the driver to manually pull the throttle back to idle if required.
- These combined features of the Pro-Pedal amount to a 40% time savings during installation

DESCRIPTION	PART NO.
Foot Throttle with Adjustable Slider	FT7000P
Foot Throttle only	FT7050P
Slider Base Plate only	FT7051P

1. Adjustable Slider Plate

2. Stainless Steel Torsion Spring to Provide a Long Life

3. Made of Reliable A380 Aluminium
